# CO<sub>2</sub> MONITOR - USER GUIDE

**Carbon Dioxide, Temperature & Relative Humidity monitor for the education sector.**

**HIGH-QUALITY | EASY TO USE | USB POWERED**

The indicators on the left of the monitor will change when CO<sub>2</sub> is increasing in the classroom, this will happen when occupancy levels rise.

The CO<sub>2</sub> monitor will always be above 400ppm as carbon dioxide is in the air we breath.

**Green (400–800ppm) Good Air Quality**

**Amber ( 800-1500ppm) Improve ventilation**

**Red (>1500ppm) Improve Ventilation**

You can improve the ventilation by opening windows or turning on mechanical

Ventilation and the level of CO<sub>2</sub> will decrease gradually. If the level of CO<sub>2</sub> is high there is no immediate risk to health.

For further information please consult your instruction manual.
