

THE MERLIN RANGE

1000VW+ SYSTEM

The Merlin 1000VW+ proving system designed specifically for use in school science laboratories and food technology classrooms where the system is required to be interlocked with the ventilation. The Merlin 1000VW+

controls three services Gas, Water and Electric to the bench sockets. On start up the Merlin 1000VW+ performs a gas-proving test on the pipe work in order to highlight if there is a gas appliance open or a gas leak in the laboratory

and offers gas isolation in the event of an emergency. Another feature of Merlin 1000VW+ is monitoring the mechanical ventilation in the classroom, if the ventilation fails or is turned off the gas will be isolated.

LABORATORY EQUIPMENT

1000VW+ SYSTEM

Advantages of the Merlin 1000VW+ System

- Works conjunction with a Merlin CO2 Monitor.
- Interlocks with the ventilation
- Controls the Gas, Water and Electricity
- Protects people and property by testing for leaks before allowing the gas on.
- Reliable method of pressure proving using the gas pressure transducer.
- Time out facility protects the building out of hours
- Low-pressure indication, continual monitoring of gas pressure.
- Clear LED display for system indications.
- Compatible with both BMS and fire alarm systems.
- No calibration required
- Covered by S&S Northern 3 year warranty

Complete piece of mind in a single panel

The Merlin 1000VW+ is designed to give the teacher full control over the incoming services with the lockable key-switch operation. The Merlin 1000VW+ can work in conjunction with carbon dioxide, natural gas, carbon monoxide and LPG sensors. The Merlin 1000VW+ also has a built in "timeout" facility which will automatically shut off the gas solenoid valve at the end of a specific time period, this time period can be adjusted to 2, 4, 8 hours or can be disabled if required.

This system is also available as gas only (Merlin 1000V) and the (Merlin 1000V+) for gas and electric isolation.
