

WLMPS Water Leak Puck with Switch Relay

Key Features:

- Water leak switch for HVAC / water heater drain pans
- Can be used to detect water or the absence of water
- N.O. and N.C. relay
- Plenum Rated
- 1950mm Core cable

Product Overview:

The S&S WLMPS water switch leak finder is designed to prevent catastrophic flooding, damage to floorings and walls by quickly detecting water leaks. The built in isolated SPDT relay changes state in alarm and provides a N.O. and N.C output. Making the WLMPS perfect for air handler / water heater or home automation controls. The 1950mm core cable provides the power and relay connections and is plenum rated, ideal for installation in drop ceilings in hospitals, schools and airports. Water detection is via two electrodes protruding from the base of the sensor, the resistance between to two is made possible by the presence of moisture.

Technical Specifications:

Alert Indication	Visual	Operating Current	0-20mA
LED	Dual Green / Red	Working Humidity	5% ~ 95%
Electrical Classification	Class 2	Working Temperature	-20c ~ 60c
Cable Length	1950mm	Cable Type	Plenum Rated
External Power	AC9-26V, DC9-36V	Water Type	Regular Moisture Condensate
Relay	Volt Free SPDT		
Housing	304 Stainless Steel
